

Geography

01/06/2020

Over the next few weeks we are going to be looking at energy and the environment. There will be three tasks to be completed weekly. Only one task needs to be completed in a day!

Task 1

This week we are going to be looking at settlers. What do you know about settlers?

Why have settlers decided to build houses here?

Think about:

- Site
- Aspect
- Resources
- Links

Task 1

Did You Come Up with Any of These?

Site:

- Flat ground
- Defended from attack

Aspect:

- Sheltered from wind

Resources:

- Water supply
- Food supply
- Fish
- Woodland animals
- Flat farmland
- Wood supply

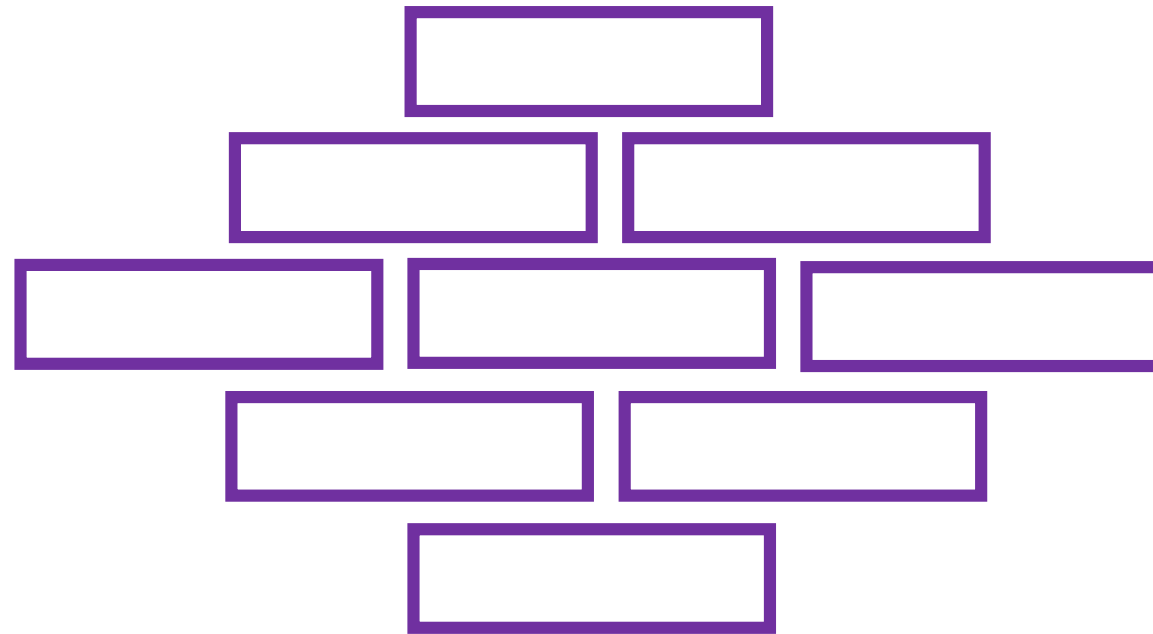

Links:

- Boat

Task 1

What Is Important to Settlers?

On a piece of paper arrange the following phrases in order of importance using the following diagram.

Woods nearby

Animals living nearby

Transport links

Flat ground

Fertile land

Easy to defend

Water supply

Shelter from weather

Task 2

Look at your work from Task 1 and answer the following questions underneath:

Which is the most important feature?

What do you think people would think is most important?

Are there any features that are missing?

Which is the least important feature?

What do you think people would think is least important?

What would you add or remove?

Task 2

Now look at these questions and answer the following:

Which needs
would have been
important 100
years ago?

Which needs
would have been
important 1000
years ago?

What would you
miss if you moved
to a settlement
from 100 years
ago or 1000 years
ago?

Task 3

Your last task is to watch a following video on settlements. After watching the video write down any facts you have found interesting and want to share with your class.

Try and write down at least five different interesting facts 😊

Click in the picture below to watch the video.
